Joseph Shraibman
David Solomonoff
Trina Semorile

We had a technical discussion about ISUbuntu.

September 21 2006

Joseph Shraibman
David Solomonoff
Trina Semorile
Danny Younger
Dovlet Saparli

Danny reported that the US government is very concerned about the WHOIS database. The EU is trying to get more privacy restrictions added.

Danny reported on his planning for the November event. He has invited Wendy Seltzer (professor of law at Brooklyn Law, member of ICANN at large advisory committee), Bruce McDonald (Trans America Financial). He has contacted the FTC, Fred Newman (.us registrar), and EPIC to line up more speakers.

We discussed creating fliers for the event.

Danny has a policy proposal for ICANN (ISOC-NY is a member of the ICANN noncommercial constituency). Currently registries are presumptively renewed, but Danny thinks renewals should be reviewed.

We resolved to oppose the presumptive proposal renewals and have competitive rebids instead.

Danny will have a draft press release ready by next Thursday.

David Solomonoff will explore a relationship with Panix for hosting our website.

David will set up a sourceforge account for the ISUbuntu project.

October 19 2006

Peter Kraljic

We discussed promoting the “Internet Privacy Wars” (our November event) by sending fliers to various other technical group meetings and posting to mailing lists.

We discussed submitting proposals to ISOC.

Our mailing lists are completely not working. Joseph will set up a temporary new announce list at Xtenit.

Danny has a url for checklists for how to design a website, which he will use when he redesigns our website.

No progress was made on the ISUbuntu project.
