Kerueln Julien
David Solomonoff
Trina Semorile
Joseph Shraibman

A new website for ISOC chapter news is being created. When it goes up Danny will contact the administrator about getting a password so we can post our announcements there.

We will put on the Discuss list a request for proposals for ISOC budget proposals.

Mike Burks (Chairman of the ISOC Disability and Special Needs Chapter) has volunteered to give a presentation on how to build accessible websites.

We need to determine from Krishna how old was the backup used to restore our website and what all the passwords for the website. We need to make sure existing email aliases are working and we need to set up an alias for Danny.

Dean McCall has offered us space at Rackspace for use to host our new website. Beach is the technical WHOIS contact for isoc-ny.org, so he can switch our dns servers if we need to.

We will have a techincal planning meeting for ISUbuntu in the near future (hopefully the first week of December). Danny will ask if we can use space at Google.

We discussed future events. We will research for possible events on the following topics: Net Neutrality, VOIP, E911, Law Enforcement on the Internet. David will look into reserving space at the Jefferson Market Library for our future events.

We will discuss the .nyc top level domain proposal at the next meeting.
